ABOUT “MERAKE OFFSHORE”

“MERAKE OFFSHORE” is an emerging company which is established as specialist in offshore & onshore supporting services dedicated to KG Basin with the highest HSE Norms and global standards. The Company is engaged in providing offshore support services to exploration and production companies. It has an objective to carry out support services in the field of offshore oil and Gas Exploration and development drilling and branching out to other value added services.

We are the Domestic Experts with sound command in the region, highly experienced management team equipped with the High-end technical & advanced Machinery, fleet and logistics, trained and competent crew to deliver on-time services to its esteemed clients with a continuous focus on reducing Non Productive Time.

In order to serve up to our clients' satisfaction, which is our premiere motto, we keep on updating ourselves on regular basis to keep abreast with the regulating needs of the oil & gas industry and educating our personnel with the latest regulations happening on the globe and getting them trained and equipped with latest gadgets. Meraki Offshore is committed to provide quality and focused offshore and onshore support services.

VISION

To be the Pioneer in Offshore & Onshore industry ensuring the best HSE Norms and redefining the Global Standards time to time.

MISSION

To Offer our Clients the Best Service with the innovative methodology in Global Standards and ensuring the Best HSE Practices in the Industry.

UNDERWATER WORKS

UNDERWATER REPAIRS

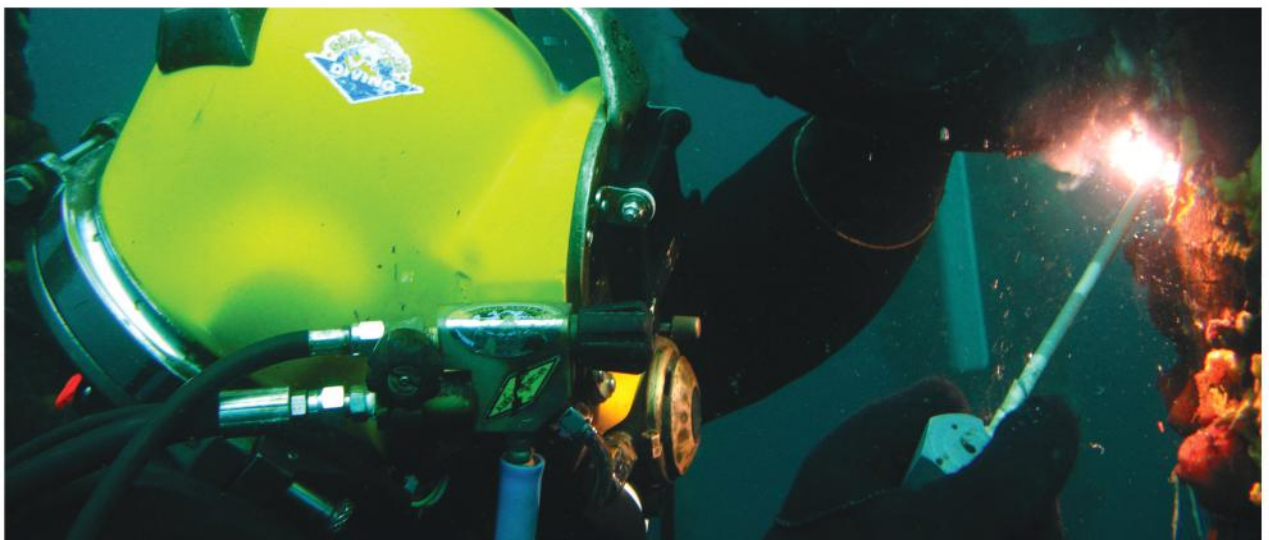

Meraki Offshore has the know-how and experience to provide comprehensive on-site repair services for offshore related units with the use of specially designed methodologies which can be rigid or flexible depending on the type of repair.

Going to drydock is often not a feasible option for offshore related units because of the down time, loss of production and subsequent financial setback this brings about. To Overcome this, Meraki Offshore designs different methodologies for our esteemed clients as per their requirement which allows a wide range of repairs to be performed while normal operations at sea are maintained.

These turnkey projects are planned and managed by Meraki Offshore in an exclusive association with Different Top Class Diving companies in the Industry.

Our technical department and diving teams are trained to carry out exact procedures and deliver a professional service while minimizing off-hire time yet maintaining high quality ensuring the HSE Norms.

UNDERWATER WORKS

UNDERWATER MAINTENANCE

Underwater monitoring: Surveys

Building upon conventional technical skills and know-how while also taking advantage of the latest technology, Meraki Offshore offers a unique hull monitoring service to its clients.

This allows our clients to be in total control of their unit's hull condition. MPI (Magnetic Particle Inspection), CPM (Cathodic Protection Monitoring), UT (Ultrasonic Testing) and ACFM (Alternating Current Field Measurement) can be carried out.

A Meraki Offshore diving/technical team can be on location and ready to service offshore units or rigs within days.

Underwater Cleaning:

Fully equipped an operational team is ready to mobilize immediately to carry out on-site high quality and fast underwater cleaning operations for offshore units

By taking advantage of a range of underwater cleaning units designed in-house specifically for offshore operations, all types of fouling can be removed from any type of offshore structure.

WASTE MANAGEMENT

Meraki Offshore's Waste Management System for Offshore and Onshore Industry ensures that all of your oil and gas waste management, hazardous waste and cleaning requirements are met.

Our Waste Management approach for oil and gas can be tailored to include hazardous waste management, general waste management, recycling, drilling waste management, decommissioning, produced water management and tank cleaning.

With over 10 years', we are a experienced team in Waste Management in East Coast Region, Specialized Fleet and Equipment; Meraki Offshore ensures the end to end process of Waste Management meets the requirements of HSE Norms as per Global Standards.

MATERIAL SUPPLY

One stop shop, Total solutions : We can supply all your needs:

We continually strive to make your work simple by presenting the convenience of dealing in a single desk for all your needs. We extended our partnerships with sourcing & services networks all over in India and overseas.

General Products

- Ropes & Hawser
- Tools
- Rigging Equipments & General Deck Items
- Pipes & Pipe Fittings
- Painting Equipment & Accessories
- Fasteners
- Hose & Hose Fittings
- Welfare Items
- Safety Protective Gear
- Ferrous & non-Ferrous items
- Welding Products & Equipments
- Life Saving Fire Fighting items
- Lubricants Sealants & Grease
- Nautical & Navigational Equipments
- Electrical Fixtures & Fittings

Specialty Products:

Our range of specialty products are supplied by the following manufacturers

LOGISTIC SUPPORT

Meraki Offshore delivers a wide range of tailored Logistic services to the oil and gas industry in KG Basin.

Utilizing the expertise and experience of our team, including all the key Offshore and Onshore locations in KG Basin, Pan India and East Coast to the Middle East, Meraki Offshore is well placed to meet the unique demands of our clients in this industry.

Whether our client is a subsea construction contractor, dredging company, marine seismic survey company, pipe laying or cable-laying contractor, Meraki Offshore has the experience and the expertise to deliver a high quality Logistic service wherever they need.

Our dedicated offshore unit can support your offshore project from conception to completion:

From the provision of specialized local information at the pre-project and planning stage, local vessel and operating permits and clearances during mobilization and the provision of a wide range of services during the project period from vessel Agency, to crew and personnel logistics and the management of onshore supply bases.

Beyond the local project we are adding value to our client's business by providing innovative global, outsourced operational and financial solutions that are helping our clients stay focused on their project and operational priorities in this dynamic and fast-moving industry.

OUR SERVICES TO THE OFFSHORE & ONSHORE SECTOR INCLUDE:
